CURRENT MARKET TRENDS

Emerging Trends in the Beauty & Wellness Sector in India

In today's day and age, with the focus and importance given to outer appearances, beauty and wellness centres in India have gained immense popularity. Right from international beauty salons, spas, and fitness and wellness centres to local beauty parlours, men and women of all ages in metropolitan cities have started incorporating them as a part of their daily lives. In other cities and towns too the scenario is rapidly changing where people are visiting salons and wellness centres at regular intervals. In terms of ranking, Indian market for beauty and wellness is one of the top five in the world.

Apart from the increasing popularity that beauty and wellness centres are enjoying, there are numerous changes in the beauty and wellness sector that are underway. There is a steady increase in the level of spending in beauty and wellness centres. Beauty treatments and wellness regimes are no longer considered a luxury, but are rather being viewed as a necessity for a healthy, balanced, and holistic life. The gender stereotype related to this sector is also giving way where unisex salons and centres are opening up in major cities along with having a large male clientele. There is a wide demand for multi-skilled technicians and specialised seniors in the market. There are also numerous national and international institutes that offer specialized and intense courses at the end of which, many participants get offered cash rewards.

One of the most admirable and remarkable changes this sector has brought about is the employment of people with special needs. Roles like beauty therapist, spa therapist, nutritionist, hair stylist, and many more are being undertaken by people with low vision, hearing impairment, blindness, and locomotor impairment. These changes will lead to a healthy and steady increase of job opportunities in the future.
